

## Private Home Readiness and Defense Evaluation and Consulting

Every 26 seconds a residential burglary occurs in the United States. That is 2.5 million residential burglaries a year, resulting in \$3 billion in property loss. Of those 1.65 million are home invasion, meaning the victim is home while the burglar(s) enter the home. How confident are you in the security measures you have in place to keep unwanted criminals out? What is your plan if someone makes it in your home. Do you know how to get to safety? Do you know how to defend yourself and your family?

This is a unique and personal service tailored to the client, the home and the location. The information is based on knowledge gained during decades of gaining entry into homes of all kinds. Searching structures, hunting people, defending ourselves and defending our teammates, ETAC can provide you with factual and experience-based data on how to make your home safer and how to defend it. Identifying both strong points in your home and areas of vulnerability. The education we provide will not only make your home a less likely target for crime, but will provide the knowledge and piece of mind that you can either escape and get to safety or defend it and your family.
