

# 20 HOUR TACTICAL CASUALTY CARE IN UNCONVENTIONAL ENVIRONMENTS

**Date: TBA      Location: TBA**  
**\$400 per Student**

This course is designed to advance law enforcement officers ability to provide lifesaving care. Students will learn how to create and execute an effective triage plan, evacuation plan and patient transportation plan. Students will learn how to apply techniques to control life threatening injuries during care under fire in unconventional environments and conditions. During the course students will demonstrate lifting, moving extracting and treating victims in environments that are dark, wet and confined. The course is a culmination of years of actual law enforcement and EMS operational experience and training and is applicable to any law enforcement officer who wants to take their life saving skills to the next level.
